
This blog post provides a summary of the latest patch provided by Adobe. The release notes provide changes and fixes. This release addresses issues with video playback, support for HDR videos, and more. You can get the latest version HERE (<http://www.adobe.com/support/premiere-pro-patch>). --- FULL Adobe Premiere Pro CC 2017 v11.1.2.22 Patch (x64)

This blog post provides a summary of the latest patch provided by Adobe for Premiere Pro CC 2017 (version 11). The release notes provide changes and fixes and it is available to download from here: <http://www.adobe.com/support/premiere-pro-patch/>. This release addresses issues with video playback, support for HDR videos and more. This is a cumulative update and includes bug fixes from earlier versions. You can read all the changes that have been made in this release on the official Adobe website. Download - Windows 64 bit - x64

Patch Notes:

- Bug fixes for Mercury Playback Engine, including an issue where video recordings did not play back correctly when using hardware encoding with Intel graphics card on macOS Sierra. This is a new fix specific to Sierra 10.12 operating system, addressing an issue introduced in PRM-2980. Details are available at <http://helpx.adobe.com/premiere-pro/kb/faq-video-recording-13.html> - Bug fixes for project management, including an issue affecting the "Save Project" dialog. - Bug fixes for Title tool, including issues with adding multiple shapes to a title, changing the angle of text in a title with onscreen controls, and an issue with Custom Shape libraries. - Bug fixes for Media Management, including an issue that affected certain operations in the Project panel when using proxy clips in a sequence with "Clip Appearance" set to Advanced. Details are available at <http://helpx.adobe.com/premiere-pro/kb/faq-video-recording-12.html> - Bug fixes for Media Management, including an issue that prevented Adobe Media Encoder from working with proxy files created in the projects containing the proxy files. The updated version of Adobe Media Encoder is now compatible with these files and can be used as an alternative to proxy files as a source for video sequences (for example, as a source for creating H265 videos within Premiere Pro). Details are available at <http://helpx.adobe.com/premiere-pro/kb/faq-video-recording-11.html> --- FULL Adobe Premiere Pro CC 2015 v9. 2.2.22 (x64)
